1 Introduction

1.1 Automated Money Making?

1.2 Goals & Requirements

2 Market Mechanics

2.1 What is Bitcoin

2.2 Auction Theory

2.3 Efficient Market Hypothesis

2.4 Trading Strategies

3 My System Design

3.1 System Architecture

3.2 Data Sources

3.3 Signal Processing

3.4 Risk Management

3.5 Strategy explained

4 Result comparison

4.1 Backtesting Results

4.2 Live Testing Period

4.3 Performance Analysis

5 Evaluation

5.1 Strategy Evaluation

5.2 Market Efficiency Implications

6 Conclusions and future work

6.1 Summary of Findings

6.2 Future Improvements

6.3 Is there a future for this strategy?

7 Reflection

7.1 Challenges

7.2 Learnings

8 Sources
